

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) Method of preparing a message in an electronic communication device comprising the steps of:

 providing, via a display of the electronic communication device, a set of
message types that can be selected by a user in an editor common for all message types,

 detecting, via a control unit of the electronic communication device, a
message type selection for a user, and

 changing, via the control unit, a transmission format in dependence of the
selections made by the user, which provides preparing and saving a message in advance
of deciding final message type for transmission or saving thereof.

2. (Previously Presented) Method according to claim 1, further comprising
the step of showing the message, typically on an information presentation unit, in a
format corresponding with the selected message type.

3. (Previously Presented) Method according to claim 1, wherein a first user
input unit allows actuation for and scrolling in a first direction and a second opposite
direction, wherein the detection of a selection by an actuation and confirmation of the
first user input unit for one direction provides selection of a message type and the

detection of a selection provides changing the transmission format in dependence of the selections made by the user.

4. (Previously Presented) Method according to claim 1, further comprising the step of saving a message.

5. (Previously Presented) Method according to claims 4, wherein the step of saving is performed in a general format.

6. (Currently Amended) Device for preparing a message in an electronic communication device comprising:

a message type selection unit providing a set of message types that can be selected by a user,

a first user input unit, for allowing message type selection by the user, and

a control unit arranged to:

provide the set of items of message types that can be selected by a user in an editor having a format common for all message types,

detect a message selection by a user via said first user input unit,

change [[the]] a transmission format in dependence of the selections made by the user which provides preparing and saving a message in advance of deciding final message type for transmission or saving thereof.

7. (Previously Presented) Device according to claim 6, wherein the first user input unit allows actuation for and scrolling in a first direction and a second opposite direction, and a second user input unit is arranged to confirm a selection, wherein the detection of a selection by an actuation of the first user input unit for one direction to an item and confirmation by the second user input unit provides selection of a message type and the detection of a selection provides changing the transmission format in dependence of the selections made by the user.

8. (Previously Presented) Device according to claim 6, wherein the control unit is arranged to change the appearance on an information presentation unit in dependence of the selections made by the user.

9. (Currently Amended) Device according to claim 6, further comprising a store selectable by a user for storing a message and wherein the control unit is further arranged to save a message in the store in a general format.

10. (Previously Presented) Device according to claim 9, wherein the control unit is arranged to automatically save the message in the store.

11. (Previously Presented) Device according to claim 6, wherein the control unit is arranged to upload the message to a predefined web address.

12. (Previously Presented) Device according to claim 11, wherein the control unit is arranged to upload the message to a predefined web address with automated log-in.

13. (Previously Presented) Device according to claim 11, wherein the control unit is arranged to upload the message to a predefined web address without automated log-in.

14. (Previously Presented) Device according to claim 6, wherein irrelevant tools is arranged not to be selectable so that a user can continue to edit in the format selected only.

15. (Previously Presented) Device according to claim 1, wherein the device is a portable electronic communication device.

16. (Previously Presented) Device according to claim 15, wherein the device is a cellular phone, a PDA or a smart-phone.
